

Cast steel globe valves flanged RF ANSI class # 300

Art. 1602

Design & construction: API 600, API 6D
 Face to face length: ASME / ANSI B16.10
 Connections & dimensions: ASME / ANSI B16.5, ASME / ANSI B 16.25
 Flanges: RF ANSI #300
 Pressure & temperature: ASME / ANSI B16.34
 Test: API 598

The cast steel globe valves are manufactured according to API, ANSI, ASME standard, for industrial applications. The cast steel globe valves have: outside screw and yoke, bolted bonnet, rising stem with top sealing. Standard materials are A216WCB/F6, other materials and other trims are available upon request. Handwheel operated, with reducing gear upon request.

Materials

body-bonnet	cast steel A216WCB, GP240GH+N
stem	A 182 F6
body seat facing	A182 F6
disc seat facing	A182 F6
stem packing	graphite
gasket	graphite
painting	high chlorinated polyethylene HCPE
