

Cast steel bellow sealed globe valves flanged PN 40

Art. 740

Flanges: UNI EN 1092-2 PN 40

Design: EN 1074

Face to face length: EN 558-1 serie 1

Installation: horizontal with the flow following the

direction of the arrow.

APPLICATIONS • Diatermic oils • Steam • Overheated

water • Oil & refineries • Industry

The cast steel globe valves with bellows do not need any maintenance. The bellow in stainless steel 304 avoids any contact between the fluid and the stem, for this reason the valves are free from maintenance. The bellow is granted for 8000 movements. The bellow sealed globe valves are suitable for severe services, such as diatermic oils, steam and flammable fluids.
